

DTR Business Systems is the VALUE-ADDED DISTRIBUTOR with a DIFFERENCE. Since 1983, DTR is committed to providing our resellers with the quality products and expert technical support that today's challenging marketplace demands. DTR customers have come to depend on DTR for a level of service that is unsurpassed and a relationship that lasts long after the sale is complete. If you are ready for a change – you need to DISCOVER THE DTR DIFFERENCE.

Pre Sales Support – The experienced team of DTR sales consultants is well versed on the features and benefits of our product lines. We assist resellers with the latest technology, hardware/software compatibility issues, and performance enhancements. We match your needs with the products that create the best price performing “solution” for you and your customer.

Custom Configured Servers - DTR provides a wide range of Intel server configurations for small/medium business & enterprise customers. Each DTR server is custom-built to your exact specifications. With a wide array of proven products from industry-leading manufacturers, we can help determine the ideal components for your configuration. Whether you need rack mount or pedestal, simple configurations or complex RAID, SCO Unix, Windows or Linux – DTR has a solution that's right for you.

Replicated site projects – Consider outsourcing your projects to DTR. We can be your single source for building, staging, and managing your replicated site projects. We can drop ship completely integrated solutions, including server, peripherals, and installation/supplies kits, to each location. “Just in time” delivery schedules are carefully managed, to meet your installation schedule.

Complete Integration - Our comprehensive integration services include the installation and testing of all devices, drivers, and related software. DTR can even pre-load your vertical application, and let you “hot-stage” the system via the Internet, enabling the server to be shipped directly to your end user – saving time and money. With DTR you have all the options you need,

Wide Area Network – From T1 to frame relay, DSL to VPN, let DTR design, configure, test, and install your WAN. Our turnkey approach includes complete integration and offers installation support and on-going maintenance. Expand your service offering and profits, by leveraging DTR's experience and expertise.

Technical support – DTR technical support is unsurpassed. Our award winning support team frequently receives testimonials from satisfied customers, praising their high level of expert and caring support. Technical certifications include, SCO ACE, MCSE, and A+.

Relationship – Our success depends on your repeat business, and we will make every effort to earn your business everyday. DTR values the relationship we have with our customers – people prefer to do business with someone they know and trust. Your dedicated DTR Account Manager is ready to partner with you for success.
